

## Preparation to load the Quad Pin Coring tool

Roll a conditioned log of clay

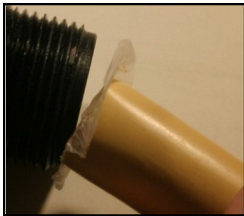

\* Measure the log of clay next to the barrel \*  
\* Trim the log of clay \*  
Keeping in mind to leave space  
for the coring tool, the collar and the disk shape  
They all must also fit into the barrel

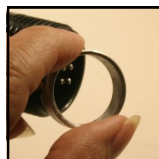

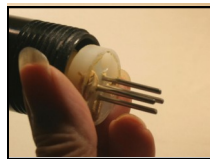

Press the silver lever with your thumb  
and at the same time pull out the black rod

The barrel is now ready to load

Place a piece of  
plastic wrap on the end  
of the log of clay  
and place it  
end first into the barrel.

\*Next place the coring tool  
\*Next place the collar  
  
\*Next place the disk shape  
and then thread on the retaining ring
